Ruthinium, your system for **removable prostheses**

Acry Rock V

code

Acrylic teeth in polymethacrylate produced with two chromatic layers.

The main characteristics are:

- High aesthetical effect due to superimposition of the two layers and due to the crown cut of incisal edges.
- Good chemical-physical resistance obtained by using the very best of raw materials.
- Large assortment of moulds and shades which make the tooth adaptable to any prosthesis requirement.

Range of 19 shades, 32 moulds of upper anteriors, 19 lower anteriors and 22 posteriors.

0010013	Acry Rock V. 6 Upper
0010014	Acry Rock V. 6 Lower
0010015	Acry Rock V. 8 Upper
0010016	Acry Rock V. 8 Lower
0020003	Acry Rock V. Set 28 Teeth

Acry Star

code

Acrylic teeth in polymethylmethacrylate produced with three chromatic layers.

The main characteristics are:

- High aesthetical effect due to the natural stratification and of the crown cut of incisal edges.
- Particular chemical-physical resistance due to the use of a high molecular weight resin.
- Large assortment of moulds and shades which make the teeth adaptable to any prosthesis requirement.

Range of 16 shades, 17 moulds of upper anteriors, 10 lower anteriors and 10 posteriors.

0050001	Acry Star 6 Upper
0050002	Acry Star 6 Lower
0050003	Acry Star 8 Upper
0050004	Acry Star 8 Lower
0060001	Acry Star Set 28 Teeth

Acry Lux

code

Acrylic teeth in polymethylmethacrylate produced with three chromatic layers.

The main characteristics are:

- high aesthetical effect due to the superimposition of the layers and due to the crown cut of incisal edges;
- particular chemical-physical resistance due to the use of a high molecular weight resin;
- large assortment of moulds and shades which make the teeth adaptable to any prosthesis requirement.

ACRY LUX: range of 19 shades, 25 moulds of upper anteriors, 12 lower anteriors and 16 posteriors.

ACRY LUX V Range of 18 shades, 25 moulds of upper anteriors, 12 lower anteriors and 16 posteriors.

0090012	Acry Lux V. 8 Lower
0090013	Acry Lux V. Set 28 Teeth
0100001	Acry Lux Set 28 Teeth

Acry Plus

code

Acrylic teeth in polymethylmethacrylate produced with 4 chromatic layers.

A unique enamel-dentine cutting has been conceived for the upper anteriors, thus increasing the translucent effect, making the Acry Plus tooth naturally characterized and "life-like".

This type of tooth has important features:

- High hardness.
- Excellent resistance to abrasion.
- Colour stability.
- Good resistance to plaque adhesion.

ACRY PLUS: range of 19 shades, 22 moulds of upper anteriors, 12 lower anteriors and 10 posteriors.

ACRY PLUS V: Range of 16 shades, 28 moulds of upper anteriors, 12 lower anteriors and 10 posteriors.

0120022	Acry Plus V. 8 Upper
0120023	Acry Plus V. 8 Lower
0120024	Acry Plus V. Set 28 Teeth

Acry Plus NM

Acry Plus NM is the posterior acrylic tooth that reproduces the primary cusps, marginal and triangular ridges to create a perfect match for the occlusal fossa. Tooth to tooth occlusion ratio is a fundamental property to make Acry Plus NM more versatile in mounting.

The natural morphology is completed by Carabelli's cusp, the fifth accessory cusp that is only found in the sixth uppers, which also stabilises the occlusion through the sensorial effect on the tongue during swallowing. Acry Plus NM is available in 3 shapes Z20 – Z17 – Z14 with cuspal angle of 45°. Ideal for any kind of prosthesis. Shade guides: Acry Plus and Acry Plus V.

code

0120030	Acry Plus NM 8 Upper
0120031	Acry Plus NM 8 Lower
0120032	Acry Plus V. NM 8 Upper
0120033	Acry Plus V. NM 8 Lower

Acry Plus EVO

Quality materials, aesthetics, natural occlusion morphology and practical innovative use are the grounds for our work to help you get the best results with:

- Complete prostheses.
- Over dentures.
- Toronto bridges.
- Bar prostheses.

Range of 16 shades, 8 moulds of upper anteriors, 5 lower anteriors and 3 posterior upper and lower.

code

0120036	Acry Plus Evo 6 Upper
0120037	Acry Plus Evo 6 Lower

0120039	Acry Plus Evo 8 Lower
0120042	Acry Plus Evo Set 28 Teeth

Acry Cette

Acrylic polymer facings designed to create temporaries easier and faster.

The key features of Acry Cette are:

- Ease of use and application.
- Guarantee of colour stability.
- Hardness.
- Excellent aesthetic results.
- Wide range of shapes and colours.

Shades available:

A2 – A3 – A3,5 – B2 – C1 – C2 – D2 – D3

Moulds:

10 upper anteriors - 6 lower anteriors

Acry Plus EVO RX

Acry Plus EVO RX is the line of radiopaque aesthetic teeth that enables the production of temporary dental prostheses, to be used as well as templates for TAC images capture. Acry Plus EVO RX are available in the same moulds as Acry Plus EVO. This means temporary prostheses will be identical to definitive prostheses.

code

0120047	Acry Plus Evo RX 6 Upper
0120048	Acry Plus Evo RX 6 Lower
0120049	Acry Plus Evo RX 8 Upper
0120050	Acry Plus Evo RX 8 Lower
0120051	Acry Plus Evo RX Set 28 Teeth

Acry C&B RX

Radiopaque C&B acrylic to be used for:

- production of templates;
- production of temporary c&b;
- neck extension on radiopaque teeth.

code

0700050	Acry C&B RX	100 g
0690005	Monomer C&B S.C.	60 ml

Acry Self RX

Radiopaque acrylic resin for palates.

Ideal for the execution of templates in partial and total prostheses. Excellent for RX detailed capture in order to consider both progress and thickness of oral mucous.

code

Evo Line Trial Kit

Content:

- 1 full set 28 Acry Plus EVO
- 1 full set 28 Acry Plus EVO RX
- 100 g Acry Self RX Powder
- 50 ml Acry Self Liquid
- 100 g Acry C&B RX Powder
- 60 ml Acry C&B Liquid
- 1 Acry Plus EVO Shade Guide

code

1170001	Evo Line - Trial Kit
---------	----------------------

Acry C&B

High molecular-weight acrylic resin for:

- temporary works in the laboratory;
- long-lasting temporary works;
- aesthetic covering on metal crowns and bridges;
- repairs.

Advantages:

- ease of use;
- versatility;
- high level aesthetic results;
- abrasion and breakage resistant;
- low bacterial plaque adhesion;
- bio-compatibility.

Shades available:

A1 A2 A3 A3,5 B2 C1 C2 D2 D3 Incisal 1

0780003	Acry Tray Liquid	2,500 ml

Acry Tray LC

Bases of light cure resin, that are very simple to use, have excellent dimensional stability and twisting resistance.

Acry Tray LC bases can be used for:

- individual impression trays;
- functional impression trays;
- bases for mounting teeth in removable dentures;
- bite plates.

Colours: Pink - Blue - Neutral

code

0800001	Acry Tray LC	50 pcs
---------	--------------	--------

Acry Pol R

Heat cure resin (PMMA) suitable for complete, partial and combined removable prostheses and for denture base reconstruction.

Main advantages:

- good mechanical resistance;
- stability of colour and dimensions;
- natural appearance.

Packaging with measuring spoon.

Shades: V1 V2 V3 V4 V7 Pink Neutral

code

0820002	Acry Pol R Powder	500 g

0880003	Acry Pol R Liquid	2,500 ml

Acry Pol Fast

Heat cure resin (PMMA) for the production of total, partial prostheses as well as combined prostheses.

- dimensional stability;
- natural shades;
- the flask can be placed directly into boiling water and the resin polymerizes in 20 minutes;
- to be used with most common techniques.

Packaging with measuring spoon.

Shades: V3 V7 V10

1000205	Acry Pol Fast Liquid	2,500 ml

Acry Pol LL

Heat cure resin (PMMA) with a high molecular weight. Suitable for complete, partial and combined removable prostheses.

Main advantages:

- high mechanical resistance;
- the long period of plasticity (1 hour) allows flasking several prostheses;
- stability of colour and dimensions;
- excellent aesthetic effect.

Packaging with measuring spoon.

Shades: V1 V2 V3 V4 V7 V10 OP Pink Neutral

0980003	Acry Pol LL Liquid	2,500 ml

Acry Pol High Impact

High molecular weight heat cure resin (PMMA).

Suitable for complete, partial and combined removable prostheses.

Main advantages:

- high mechanical resistance and high resistance to breaking-point loads even with reduced thickness;
- ideal for lightweight prostheses;
- excellent aesthetic effect.

Packaging with measuring spoon.

Shades: H3 H4 OP

Alginate

Alginate for high precision dental impressions. Available in both Chromatic and Dust Free. Packaging of 12 bags of 453g each.

Chromatic:

Alginate with colour changes.

Flavour: fruit.

Chromatic variations: White – Mixing.
Violet – Working.
Pink – Mouth insertion.

Dust Free:

Fast mixing and setting time.

Flavour: strawberry.

Colour: pink.

code

2040001	Alginate - Chromatic	453 g
2060001	Alginate - Dust Free	453 g

Ruthinium Mass

C-Silicone for the production of preliminary impression in the technique of the double impression. High flowability, high final hardness and resistance to deformation.

Packaging: 900 ml.

code

2110001	Ruthinium Mass	900 ml
---------	----------------	--------

Ruthinium Fluid Light Body

Light body C-silicone to be used for second impression. High flowability and watercompatibility it allows to obtain very high precision impressions. Low viscosity, odourless and scentless.

Packaging: 140 ml.

code

2120001	Ruthinium Fluid L.B.	140 ml
---------	----------------------	--------

Activator Paste

Catalyst in gel.

Packaging: 40 ml.

code

2140001	Activator Paste	40 ml
---------	-----------------	-------

Alabaster

Dental Plaster (type II) for complementary processes such as fixing models to the articulator.

Shade: white.
Packaging: 25kg bag.

code

2310001	Alabaster White Bag	25 Kg
---------	---------------------	-------

Ruthinium Stone

Hard Dental Plaster (type III) for the preparation of models and prosthesis flasking.

Shades: yellow, blue.
Packaging: 25kg bag, 2kg jar, 5kg jar.

code

2210001	Yellow Stone Jar	2 Kg
2220001	Yellow Stone Jar	5 Kg
2230001	Yellow Stone Bag	25 Kg
2250001	Blue Stone Jar	2 Kg
2260001	Blue Stone Jar	5 Kg
2270001	Blue Stone Bag	25 Kg

Hardstone

Hard Dental Plaster (type III) for mobile prostheses. Greater hardness and resistance to abrasion. High quality models, excellent prosthesis results.

Shade: yellow.
Packaging: 25kg bag, 2kg jar, 5kg jar.

code

2290001	Hardstone Jar	2 Kg
2290002	Hardstone Jar	5 Kg
2290003	Hardstone Bag	25 Kg

Stumps Rock

Extra hard plaster for stumps (type IV). Preparation of removable stumps and models. Excellent results in the production of models. For removable prostheses and cast partial dentures. High resistance to abrasion and compression.

Shade: Light brown.
Packaging: 25kg bag.

code

2420001	Stumps Rock	5 Kg
---------	-------------	------

Pins for stumps

Removable conic pins for stumps in hard, milled, turned brass.
Available with or without tab.

code

6260001	Pins N.1 S.S.	100 pcs
6260002	Pins N.2 S.S.	100 pcs
6270001	Pins N.1 C.S.	100 pcs
6270002	Pins N.2 C.S.	100 pcs

Acry Film

Insulating material for plaster. Rapid absorption. Creates a thin, resistant film between the plaster and the resin.
The solution penetrates the plaster in depth and completely obstructs the micro pores without varying the dimensions of the model.

code

0150001	Acry Film	1,000 ml
0150002	Acry Film	5,000 ml
0160001	Acry Film	500 ml
0170001	Acry Film	250 ml

Labor Mass

code

C-Silicone for laboratory. Hardness: 85Sh.A.

Uses:

- Repairs and packing of prostheses;
- Masks;
- Duplication of moulds;
- Separation teeth-plaster in the mould.

Features:

- Soft in mixing phase;
- No reaction with the resins;
- Excellent dimensional stability;
- Excellent heat resistance.

Packaging: 5 kg pail and measuring spoon.

2180004

Labor Mass

5 Kg

2180006

Labor Mass + 3 Cat.

4,200 ml

Cromo Casting Fast

Phosphate investment for chrome-cobalt castings. Very precise, resistant and easy to use in rapid and traditional techniques.

Packaging: 50 pre-dosed bags of 400g.

code

3770002

Cromo Casting Fast

20 Kg

Kera Casting Fast

Phosphate bonding investment. It can be used for both rapid and conventional techniques. Its characteristic, fine grain and absence of graphite means even the tiniest details are reproduced. Suitable for all types of castings in fixed prostheses (precious and non precious alloys).

Packaging: 28 pre-dosed bags of 160g.

code

4150001

Kera Casting Fast

4,480 g

Ruthinium Liquid

Liquid for phosphate investments.

code

3810001

Ruthinium Liquid

750 ml

3850001

Ruthinium Liquid

1,000 ml

3860001

Ruthinium Liquid

5,000 ml

Ruthinium, your system for **cast partial dentures**

Chrome Cobalt Hard

Chrome-cobalt-molybdenum alloy for induction fusion. High resilience. Excellent quality/price ratio (material made in Germany).

code

3020003

Chrome Cobalt Hard

1 Kg

Soldering Rods

For soldering Chrome-Cobalt Molybdenum alloys.

code

3070002

Soldering Rods

20 pcs

Soldering Flux

Deoxidizer for Chrome-Cobalt and all non precious alloys.

code

3080001

Soldering Flux

30 g

Plastiform

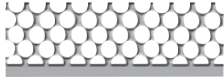

Plastic preformed models for modelling cast partial dentures.
No residuals are left in the heating oven to produce a casting free of imperfections.
Available in 56 shapes for any sort of need. 10 blister pack.

Mounted stones for chrome cobalt - E

code

Brown mounted stones for finishing.

Available in shapes:

- E1-E2-E3-E4 (ground).
- E5-E6 (not ground).

Pack of 100 stones with mandrel \varnothing 2.35 mm.

50200E1	Mounted stones E1	100 pcs
50200E2	Mounted stones E2	100 pcs
50200E3	Mounted stones E3	100 pcs
50200E4	Mounted stones E4	100 pcs
50200E5	Mounted stones E5	100 pcs
50200E6	Mounted stones E6	100 pcs

Mounted stones for chrome cobalt - R

code

Brown mounted stones for finishing.

Available in shapes:

R1-R2-R3-R4-R5-R6-R7-R8-R9 (not ground).

Pack of 100 stones with mandrel \varnothing 2.35 mm.

50400R1	Mounted stones R1	100 pcs
50400R2	Mounted stones R2	100 pcs
50400R3	Mounted stones R3	100 pcs
50400R4	Mounted stones R4	100 pcs
50400R5	Mounted stones R5	100 pcs
50400R6	Mounted stones R6	100 pcs
50400R7	Mounted stones R7	100 pcs
50400R8	Mounted stones R8	100 pcs
50400R9	Mounted stones R9	100 pcs

Mounted stones for chrome cobalt - P

code

Ruby coloured mounted stones for any sort of roughing work.

Available in shapes:

P1-P2-P3.

Pack of 100 stones with mandrel \varnothing 2.35 mm.

50500P1	Mounted stones P1	12 pcs
50500P2	Mounted stones P2	12 pcs
50500P3	Mounted stones P3	12 pcs

Mounted stones for steel - S

code

White mounted stones for finishing steel and nickel-chrome alloys for permanent prostheses.

Available in shapes:

S1-S2-S3-S4-S5.

Pack of 100 stones with mandrel \varnothing 2.35 mm.

50700S1	Mounted stones S1	100 pcs
50700S2	Mounted stones S2	100 pcs
50700S3	Mounted stones S3	100 pcs
50700S4	Mounted stones S4	100 pcs
50700S5	Mounted stones S5	100 pcs

Mounted stones for precious alloys- AU

code

Fine grain mounted stones for finishing precious alloys.

Available in shapes:

AU1 – AU1/A – AU2 – AU3 (ground).
AU4 – AU5 – AU6 – AU7 (not ground).

Pack of 48 stones.

5090AU1	Mounted stones AU1	48 pcs
5090AU2	Mounted stones AU2	48 pcs
5090AU3	Mounted stones AU3	48 pcs
5090AU4	Mounted stones AU4	48 pcs
5090AU5	Mounted stones AU5	48 pcs
5090AU6	Mounted stones AU6	48 pcs
5090AU7	Mounted stones AU7	48 pcs
509AU1A	Mounted stones AU1/A	48 pcs

Mounted stones for ceramic - K

code

Medium grain mounted stones for finishing ceramic parts.

Available in shapes:

K1 – K1/A – K2 – K3 (ground).
K4 – K5 – K6 – K7 (not ground).

Pack of 48 stones.

51100K1	Mounted stones K1	48 pcs
51100K2	Mounted stones K2	48 pcs
51100K3	Mounted stones K3	48 pcs
51100K4	Mounted stones K4	48 pcs
51100K5	Mounted stones K5	48 pcs
51100K6	Mounted stones K6	48 pcs
51100K7	Mounted stones K7	48 pcs
5110K1A	Mounted stones K1/A	48 pcs

Mounted stones for resin - D

code

Mounted stones high removal capacity.

Does not overheat the resin enabling continuous operation.

Available in shapes:

D1 – D2 – D3 – D4 – D5.

Pack of 4 stones.

51200D1	Mounted stones D1	4 pcs
51200D2	Mounted stones D2	4 pcs
51200D3	Mounted stones D3	4 pcs
51200D4	Mounted stones D4	4 pcs
51200D5	Mounted stones D5	4 pcs

Wheels for chrome cobalt

code

Abrasive wheels for roughing and finishing chrome-cobalt and non-precious alloys. Excellent removal capacity.

Pack of 100 pcs.

5130001	Bronze wheels 22x3,5	100 pcs
5140001	Brown wheels	100 pcs
5140002	Pink wheels	100 pcs
5140003	White wheels	100 pcs

Wheels for precious alloys and ceramic

Abrasive wheels for finishing precious alloys and ceramic. Available in fine grain for precious alloys and medium grain for ceramics.

Packaging:
• 100 pcs.

code		
5150001	Wheels 22x3,3 mm	100 pcs
5150003	Wheels 20x3 mm	100 pcs
5150005	Wheels 18x2,5 mm	100 pcs
5150006	Wheels 16x2 mm	100 pcs
5160001	Wheels 22x3,5 mm	100 pcs
5160003	Wheels 20x3 mm	100 pcs
5160005	Wheels 18x2,5 mm	100 pcs
5160006	Wheels 16x2 mm	100 pcs

Separating discs

Extra fine separator discs with high cutting capacity. Suitable for extremely fine separation work.

Packaging:
• 200 pcs.

code		
5170001	Discs 19x0,3 mm	200 pcs
5180001	Discs 22x0,3 mm	200 pcs

Separating discs

Separating discs brown coloured with high cutting capacity. In strong resinoid material.

Packaging:
• 100 pcs.

code		
5190001	Discs 22x0,6 mm	100 pcs
5200001	Discs 25x0,7 mm	100 pcs

Pin cutter discs

Pin cutter brown coloured discs with high cutting capacity. In strong resinoid material.

Packaging:
• 100 pcs.

code		
5210001	Discs 40x1 mm	100 pcs
5220001	Discs 37x0,7 mm	100 pcs
5230001	Discs 35x0,7 mm	100 pcs
5240001	Discs 35x1 mm	100 pcs

Roughing discs

Roughing discs brown coloured with high abrasive capacity. In strong resinoid material.

Packaging:
• 50 pcs mm 35x3.
• 100 pcs mm 35x1,7.
• 100 pcs mm 32x2,2.

code		
5250001	Discs 35x3 mm	50 pcs
5260001	Discs 35x1,7 mm	100 pcs
5270001	Discs 32x2,2 mm	100 pcs

Stone for grinding

For grinding of abrasives and mounted stones.

code		
5280001	Stone 60x15x10 mm	

Polishing felts

Polishing felts for metal polishing.

Packaging:
 Bag 50 pcs - Wheels mm 25x4.
 Bag 100 pcs - Cylinders mm 15x7.

code

5300001	Wheels 25x4 mm	50 pcs
5310001	Cylinders 15x7 mm	100 pcs

Rubber wheels for precious alloys

Rubbers wheels for finishing all precious alloys.
 Available in the grey version (medium)
 and white version (soft).

Packaging:
 • 30 pcs.

code

5320001	Rubbers 22x3,5 mm	30 pcs
5330001	Rubbers 22x3,5 mm	30 pcs
5340001	Rubbers 19x3,5 mm	30 pcs
5350001	Rubbers 19x3,5 mm	30 pcs
5360001	Rubbers 17,5 mm	30 pcs
5370001	Rubbers 17,5 mm	30 pcs
5380001	Rubbers 6x25 mm	30 pcs

Rubber wheels for chrome cobalt

Rubber wheels for the most efficient polishing of Chrome-Cobalt, steel and Nickel-Chrome alloys.
 Available in the red version (hard) and grey version (soft).

Packaging:
 • 100 pcs.

code

5390001	Red wheels	100 pcs
5400001	Grey wheels	100 pcs
5410001	Red rubbers	100 pcs
5420001	Grey rubbers	100 pcs

Mandrels

Stainless steel mandrels for wheels, separating discs and pin cutter discs.

Packaging:
 • 10 pcs.

code

5470002	Mandrels	10 pcs
---------	----------	--------

Bristle brushes

For finishing of dental alloys and smoothing of resin.
 Wooden centre, black bristle, very strong.
 Diameter 80 mm.

Packaging:
 • 5 Brush pack, 4 convergent layers.
 • 5 Brush pack, 4 parallel layers.

code

5480002	Convergent layers	5 pcs
5490002	Parallel layers	5 pcs

Brushes for polishing

Brushes for polishing dental alloys and resins. Available in black, white and goat bristle. Diameter 50 mm.

Packaging:
5 Black bristle pack.
5 White bristle pack.
5 Goat bristle pack.

code

5510002	Black bristle	5 pcs
5520002	White bristle	5 pcs
5530002	Goat bristle	5 pcs

Bristle brush

Black bristle brush for cleaning the workstation. Total length 200mm, bristle length 47mm.

code

5560001	Bristle brush 200x47 mm
---------	-------------------------

Metalux

Abrasive paste used for polishing and roughing of precious and not precious alloys. Green type and Blue type for the polishing; Violet type for the roughing.

code

5570001	Metalux Green	1,000 g
5580001	Metalux Green	500 g
5590001	Metalux Green	100 g
5600001	Metalux Blue	1,000 g
5610001	Metalux Blue	500 g
5620001	Metalux Blue	100 g
5630001	Metalux Violet	1,000 g
5640001	Metalux Violet	500 g
5640002	Metalux Violet	100 g

Acry Lux Paste

Abrasive paste for polishing of dentures.

code

5650001	Acry Lux Paste	1,000 g
5660001	Acry Lux Paste	500 g
5670001	Acry Lux Paste	100 g

Acry Lux Cream

Cream for shining of dentures.

code

5680001	Acry Lux Cream	250 g
5690001	Acry Lux Cream	100 g

Acry Lux Liquid

Liquid for shining of dentures.

code

5700001	Acry Lux Liquid	1,000 ml
5710001	Acry Lux Liquid	250 g

Pumice**code**

Italian volcanic pumice, maximum purity and extra fine grain.
Used for honing of total or partial removable prostheses.

5720001	Pumice	5 Kg
5730001	Pumice	10 Kg
5750001	Pumice	20 Kg

Corindone**code**

Abrasive material for sanding chrome-cobalt and nickel-chrome prostheses. Excellent impact strength.

3140002	Corindone	25 Kg
---------	-----------	-------

Modelling wax

code

Wax for gnathologic modelling and any fixed prosthesis procedures.

6010002	Green Wax	500 g
6020001	Green Wax	100 g
6030002	White Wax	500 g
6040001	White Wax	100 g

Sticky wax

code

Wax for bonding. Elevated hardness and low contraction.

6050002	Sticky wax	500 g
6060001	Sticky wax	100 g

Wire Wax

code

Wax wires used as casting channels. They adapt perfectly to required curves.

Packaging:

- 50 single wires.

6070005	Wire Wax 1 mm	50 pcs
6070006	Wire Wax 1,2 mm	50 pcs
6070007	Wire Wax 1,8 mm	50 pcs
6070008	Wire Wax 3 mm	50 pcs
6070009	Wire Wax 3,3 mm	50 pcs

Wire Wax

code

Wax wires used as casting channels. They adapt perfectly to required curve.

Packaging:

- 1 coil.

6080006	Wire Wax 2,5 mm	250 g
6080007	Wire Wax 3 mm	250 g
6080008	Wire Wax 3,5 mm	250 g
6080009	Wire Wax 4 mm	250 g
6080010	Wire Wax 5 mm	250 g

Hartiwx

code

Wax for bite rims.

Used to determine the occlusion plane and identify the correct relationship between the upper and lower arches. Available in the rigid (blue) and soft (yellow) curved versions.

6100002	Yellow Hartiwx	96 pcs
6110003	Blue Hartiwx	1,000 g

Calibrated wax

Sheets of calibrated wax for modelling cast partial dentures.
Available in the smooth or stippled versions.
Pliable and hard wearing, it does not leave any residual deposits during casting.

code

6140001	Smooth Calibrated Wax 0,3 mm
6140002	Smooth Calibrated Wax 0,4 mm
6140003	Smooth Calibrated Wax 0,5 mm
6140004	Smooth Calibrated Wax 0,6 mm
6140005	Smooth Calibrated Wax 0,7 mm
6140006	Smooth Calibrated Wax 0,8 mm
6150001	Stippled Calibrated Wax 0,3 mm
6150003	Stippled Calibrated Wax 0,4 mm
6150004	Stippled Calibrated Wax 0,5 mm
6150005	Stippled Calibrated Wax 0,6 mm

Plastiwax

Pink wax in sheets for modelling removable prostheses.
Can be used throughout the year.
When heated moulds easily and quickly.

code

6170001	Plastiwax	500 g
6170002	Plastiwax	1,000 g

Pre-Coat

A protective ready mixed investment for cast partial dentures. It protects Plastiforms against corrosion of the investment liquid.
Ideal for a more precise reproduction of details.
Perfect adhesion to the investment.

code

3500001	Pre-Coat	250 ml
3500002	Thinner	1,000 ml

Cromlux

Solution for electrolytic polishing.
It gives a bright and even finish to chrome-cobalt alloy products. Long lasting.

code

3560001	Cromlux	1,000 ml
3570001	Cromlux	5,000 ml
3570002	Cromlux	25,000 ml

Wax Model Hardener

Investment model hardener (wax based) to make the model smoother and less crumbly. Very hard and smooth surfaces are obtained with excellent adhesion to the Plastiform.

code

3580001	Wax Model Hardner	1,000 g
---------	-------------------	---------

Fluid Model Hardener

Investment model hardener (liquid based) to make the model smoother and less crumbly. Very hard and smooth surfaces are obtained with excellent adhesion to the Plastiform.

code

3600001	Fluid Model Hardner	1,000 ml
3610001	Fluid Model Hardner	5,000 ml
3600002	Thinner	1,000 ml
3610002	Thinner	5,000 ml

Casting Pins

Plastic pins for casting. Made in calcinable material.

Available in versions:

Type A - Blue – stem Ø 1.5 mm and base Ø 4 mm
Type B - Green – stem Ø 1.5 mm and base Ø 6 mm
Type C - Red – stem Ø 2.5 mm and base Ø 5 mm

code

6250001	Pins for Casting 1/A	200 pcs
6250002	Pins for Casting 1/B	200 pcs
6250003	Pins for Casting 1/C	200 pcs

Microspheres

Plastic microspheres for mechanic bonding between c&b resin and alloy.

Available in versions:

0.4 Ø mm with adhesive lacquer
0.6 Ø mm with adhesive lacquer

6280001	Microspheres + Lacquer 0,4 mm	
6280002	Microspheres + Lacquer 0,6 mm	
6290001	Microspheres 0,4 mm	
6290002	Microspheres 0,6 mm	
6300001	Adhesive lacquer for Microspheres	

We take care of your smile

Ruthinium® Group – Dental Manufacturing S.p.A. is established in Turin (Italy) in 1965 from the idea of its founding fathers of creating dental materials for mobile prosthesis.

In 1967 the Company has expanded the range of products offered and the idea of manufacturing acrylic resin teeth as core business is implemented.

Investments on research and development have enabled the opening of a manufacturing plant in Badia Polesine (RO) in 1969, present head office of the Company.

Together with the development of acrylic resin teeth, energies and investments are directed on research of acrylic polymers and copolymers as to consolidate the Company as worldwide leader in the production of dental materials for mobile prosthesis.

In 1998 the Company has obtained the certification according the disposition UNI EN ISO 9001:2000 and presently is certified UNI EN ISO 13485:2003 and UNI EN ISO 9001:2008.

With the come into force of European Dispositions 93/42 CEE all the medical devices have the CE mark issued by Notified Body SGS.

Dental Manufacturing S.p.A.
